

# BEAN MOSAIC

## Materials:

Owl template

Dried beans (4  
different colors)

Plastic  
containers

Pencil or wooden  
dowel

Glue.

## Instructions:

- To make an owl bean mosaic, print the owl template.
- If you can't print the template, you can draw your own owl.
- Sort the different colored dried beans into small containers.
- For the best result, you will need at least four different colors of dried beans.
- Before you start gluing, you can layout the beans on the template to determine where the different colored beans will go.
- Start by gluing the beans in the middle of the owl and work your way outward. This will ensure that all the beans will fit.
- You can use a pencil or thin wooden dowel to spread the glue and place the beans on the template.
- Continue gluing the beans until the template is completely filled.
- Now you have an owl bean mosaic!
