

# MAKE A PAPER BAG APPLE TREE

## Materials:

Paper bag  
Red paper  
Green paper  
Stapler  
Scissors  
Glue stick

## Instructions:

- Cut the paper bag into strips, stopping about halfway down.
- Open the bag up to make it stand up on its own.
- With your hand in the middle, twist the bag around to make the trunk and secure with a stapler.
- Start twisting two strips together to make branches. Continue twisting till all the strips have been used. The tighter you twist the more the branches become smaller and stronger.
- Use the stapler to attach the green paper to the bottom of the bag.
- Twist the branches together to extend the length of the trunk and secure with the stapler.
- Cut red circles out to make the apples and attach them to the branches with a glue stick.
